DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species I, claim 1, in Paper No. 6 is acknowledged. Claims 2-9 are withdrawn from consideration as being directed towards a non-elected invention.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Jang (U.S. Patent No. 6,235,633 B1).

Jang discloses in figures 1-6 a method of manufacturing a semiconductor device. In figure 1 Jang discloses depositing an interlayer insulator film 20,22 on a substrate including a plurality of conductive layers 14,16,18. In figure 3 Jang discloses forming a plurality of contact holes 2 running through the interlayer insulator film to reach respective ones of the plurality of conductive layers, each of the contact holes having a tapered portion at an upper end thereof. In figure 4 Jang discloses depositing a conductive material film 28 on the interlayer insulator film so as to fill the plurality of contact holes. In figure 5 Jang discloses removing the conductive material film until a surface of the interlayer insulator film is exposed so as to form a plurality of plugs made of the conductive material film filling the
